Get on Board with Railroad Safety!

Trains are fun! But they also can be dangerous. That's why railroad safety is so important—keep reading to find out how you can help yourself, your family, and your friends stay safe!

Trains Can Be Sneaky!

Trains are heavy and move fast, but you won't always hear a train coming. Keep your eyes open and look for a safe place to cross.

Keep Off the Tracks!

Being too close to a train or train tracks can be dangerous. Don't ever walk or ride your bike on or next to the tracks.

Only Cross Where It's Safe!

If you need to cross railroad tracks, look for an overpass, underpass, or sidewalk.

I Spy... Railroad Signs and Signals!

If you see any of these signs, you're near railroad tracks and need to be extra careful:

Advanced Warning Sign

This sign warns you that the road crosses railroad tracks ahead!

Crossbuck

This means you're at the railroad track!

ENS Sign

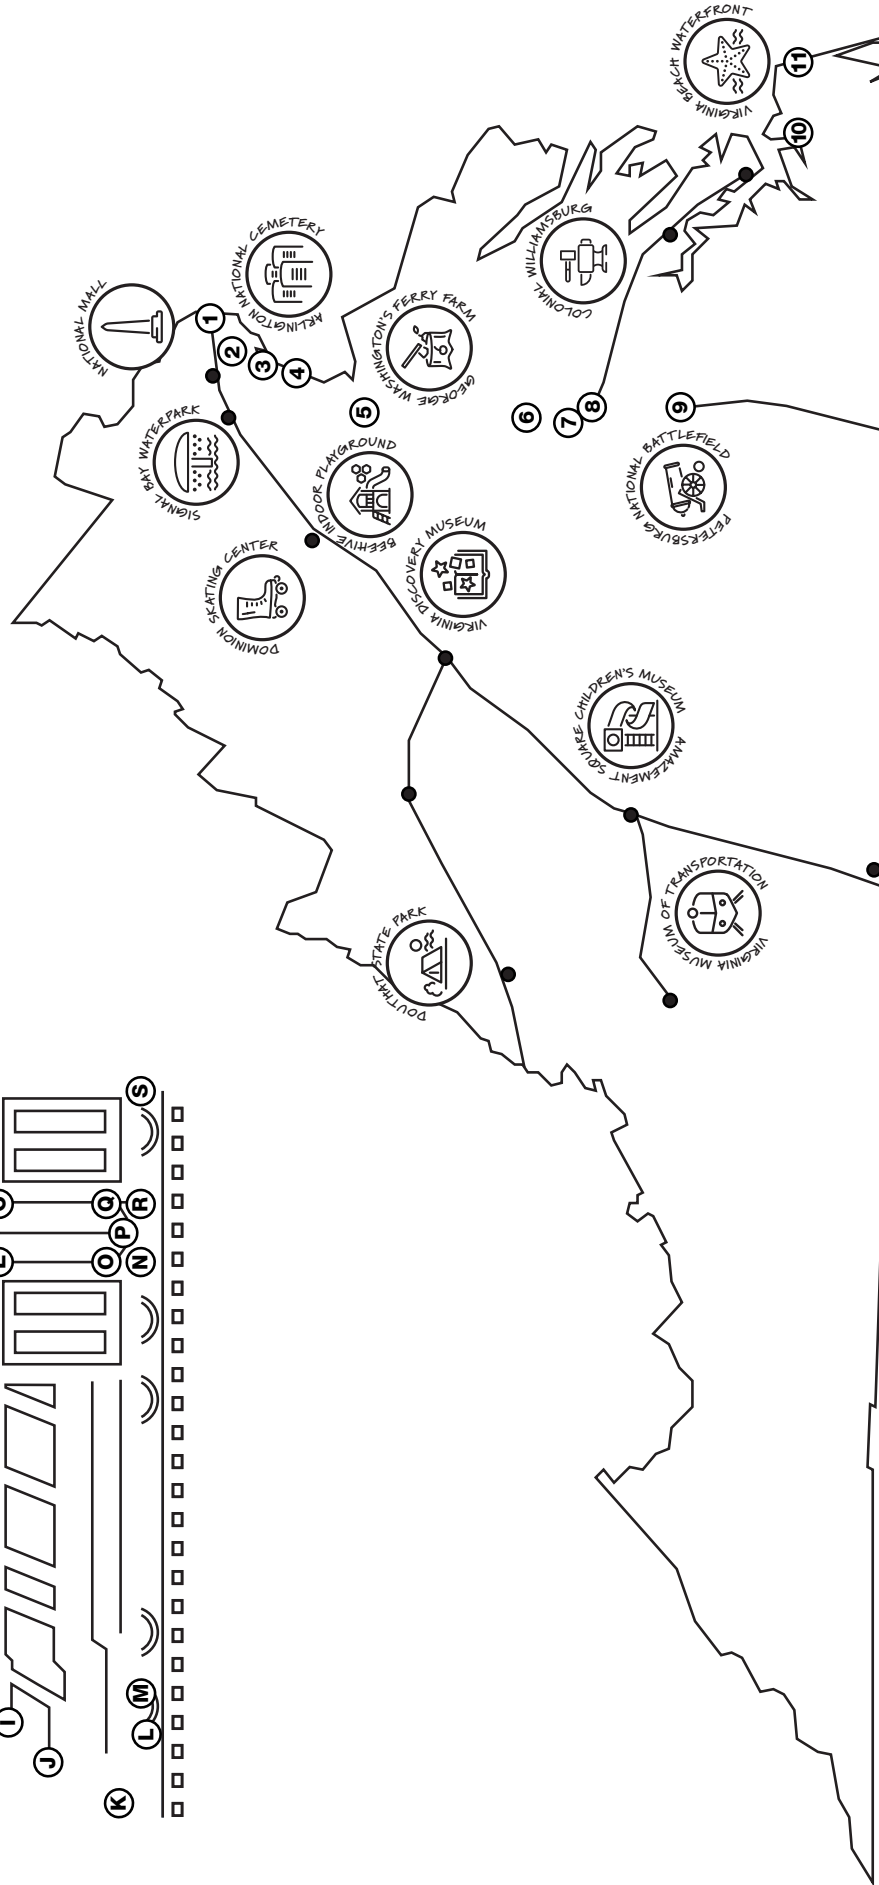

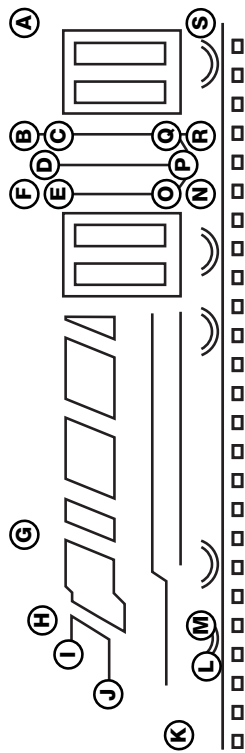

This sign tells you the railroad crossing number and a phone number to call if you need help!

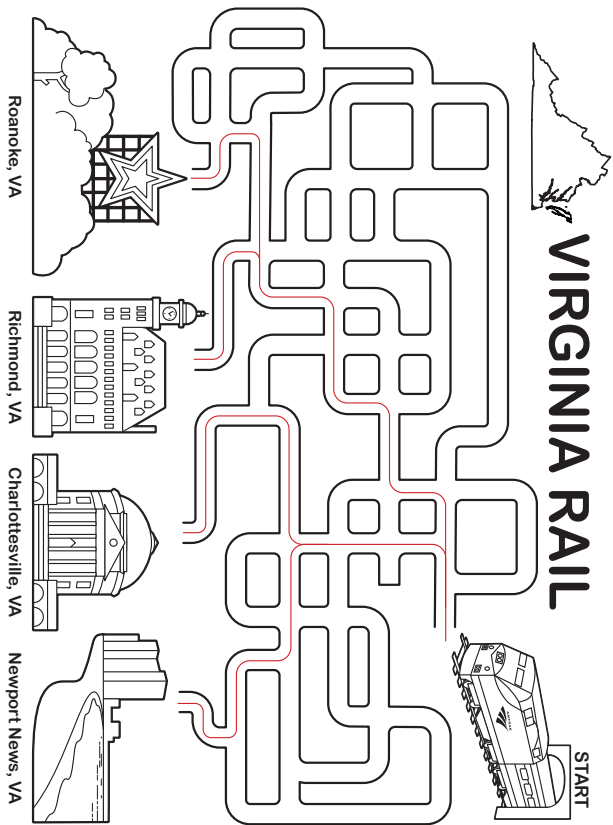

Flashing Red Lights

If the red lights are flashing, a train is coming!
