

King and Commonwealth Rail Bridges Replacement

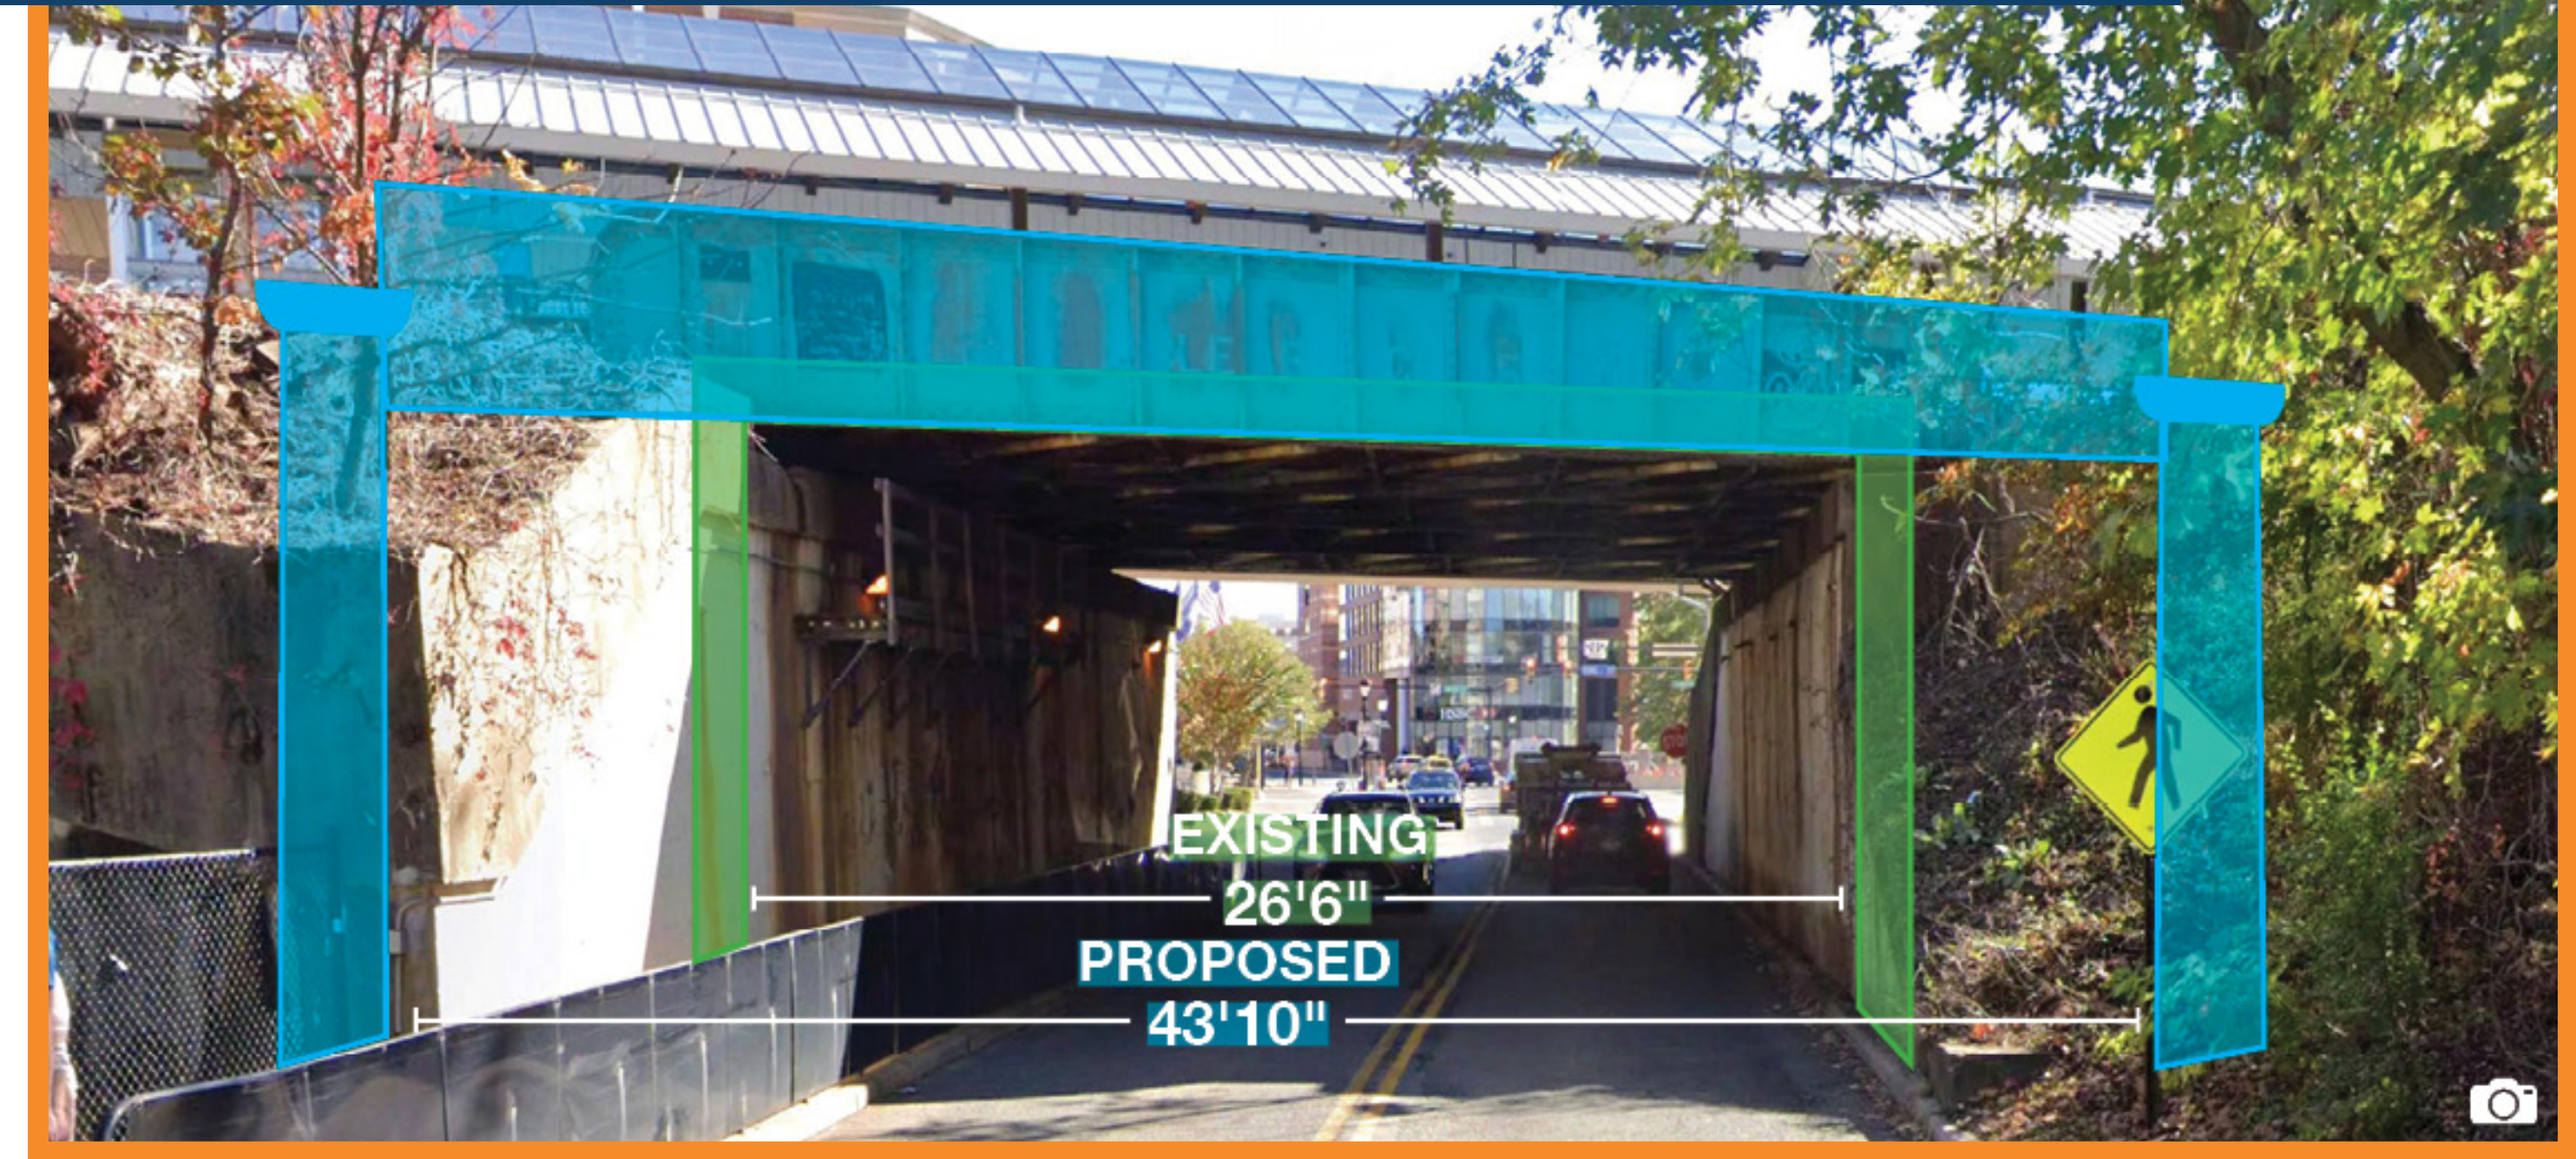

Project Status: In engineering design

The Virginia Passenger Rail Authority (VPRA), in collaboration with CSX Transportation (CSXT), will design and construct replacement rail bridges over King Street and Commonwealth Avenue in Alexandria, VA. Replacing the rail bridges will reduce maintenance and minimize rail service interruptions while modernizing the bridges to current bridge standards. It will also improve safety for pedestrians and motorists under the bridges.

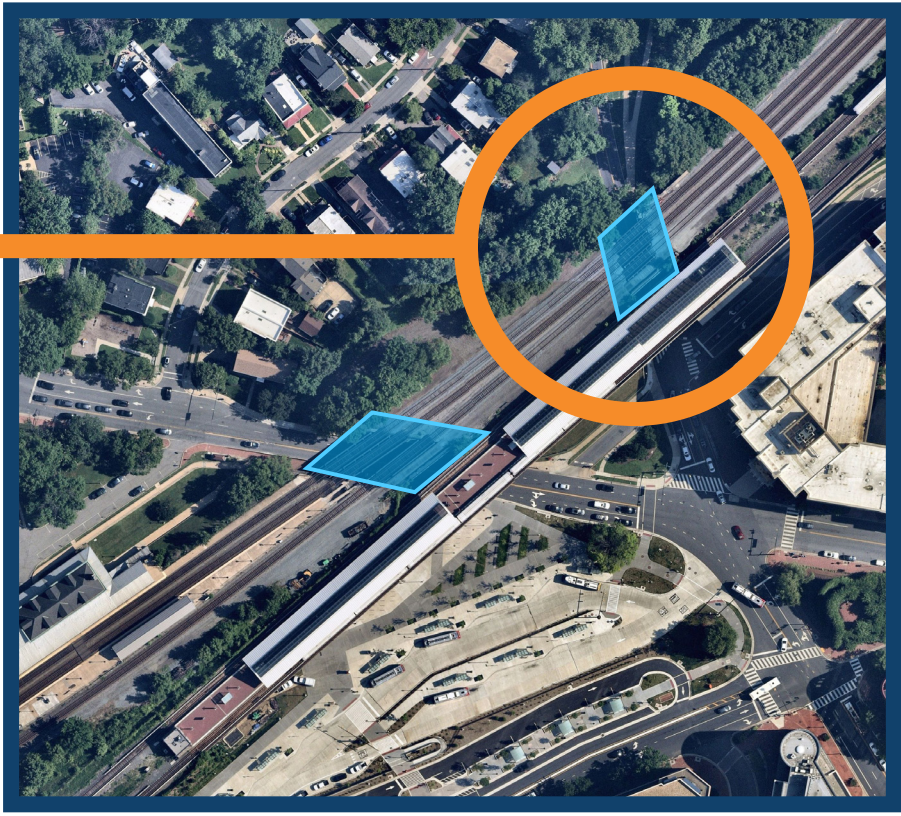

Engineering design currently is 60% complete. The construction timeline is in development.
